Modern

Modern

The word “modern” is one of the most misused phrases in decorating. Often confused with contemporary style, today’s modern style is based on a design movement 20th century. that was birthed around the turn of the Modern style furnishings and decor celebrate natural materials, neutral or earthy colors, and the elimination of unnecessary detailing. While you may see a range of colors in contemporary styling, modern styles would .have monochromatic colors

Boho

Boho

Boho design revolves around elements of the natural world — literally and visually. According to designer and Jungalow creator Justina Blakeney, plants are primary. They infuse life, air and energy into a space. Pair them with bright colors and geometric patterns for an maximal look. If your green thumb isn't up to speed, (try using nature-inspired patterns (florals or leafy prints

Parisian

The Parisian-style decor is just spectacular. With high ceilings, tall windows, carved moldings (“moulures”), marble fireplaces, herringbone parquet floors, and wall panelings (“boiseries”), Parisian apartments have truly charming architectural details. And Parisians know exactly how to sublime these exquisite architectural elements with just a few decor pieces and by following specific interior styling rules. Sophisticated and elegant, the Parisian style decor is timeless

Industrial

Industrial

Inspired by repurposed factories from the Industrial Revolution, the industrial home design style embraces exposed architectural elements like pipes, brick, and concrete, and minimalist design philosophy. The interior design style also includes Edison light bulbs, open floor plans, and a cool, neutral color palette

While the design is based on minimalist, open spaces, the blend of various rustic materials in furniture and lighting accents provides homeowners the opportunity to bring industrial interior design into any living space. Contemporary homes, in particular, use a combination of industrial, mid-century modern and farmhouse style to create a cozy blend in living rooms, dining rooms, or throughout the home

Most people are today familiar with the concept of minimalism, which involves stripping things down to their most basic form. It can be applied to anything from art and lifestyles to architecture and interior design

Minimalist interior design is very similar to modern interior design and involves using the bare essentials to create a simple and uncluttered space. It's characterised by simplicity, clean lines, and a monochromatic palette with colour used as an accent. It usually combines an open floor plan, lots of light, and functional furniture, and it focuses on the shape, colour and texture of just a handful of essential elements

*Soft
minimalist*

Soft minimalism is all about creating spaces that are warm, comfortable and inviting,” says Eugene Cheah, .co-director of Cheah Saw Architecture

These can be places of respite, such as a bedroom, or a setting for social interaction, such as a living or dining room. But most importantly, the design considers how people engage and experience a space. As such, spaces tend to be open and uncluttered, and feature rich materials and handcrafted elements

Classic

!

Classic architecture generally refers to the architectural styles of ancient Greece and Rome, which have had a profound influence on Western architecture. These styles are characterized by a set of principles and design elements that have been emulated and adapted throughout history

Classic

Modern

Modern

Modern architecture, often characterized by clean lines, simplicity, and a focus on functionality, emerged in the early 20th century. One simple aspect of modern architecture is its departure from traditional ornamentation. Unlike older styles, modern buildings tend to avoid unnecessary decorative elements, favoring a more minimalist and straightforward approach to design. This emphasis on simplicity and a lack of ornamentation is a hallmark of modern architecture.

This revival of classical forms and principles drew inspiration from ancient Greek and Roman architecture. Neo-Classical architecture 18th and became especially popular during the late 19th centuries and continued to influence design early 20th centuries 19th and throughout the

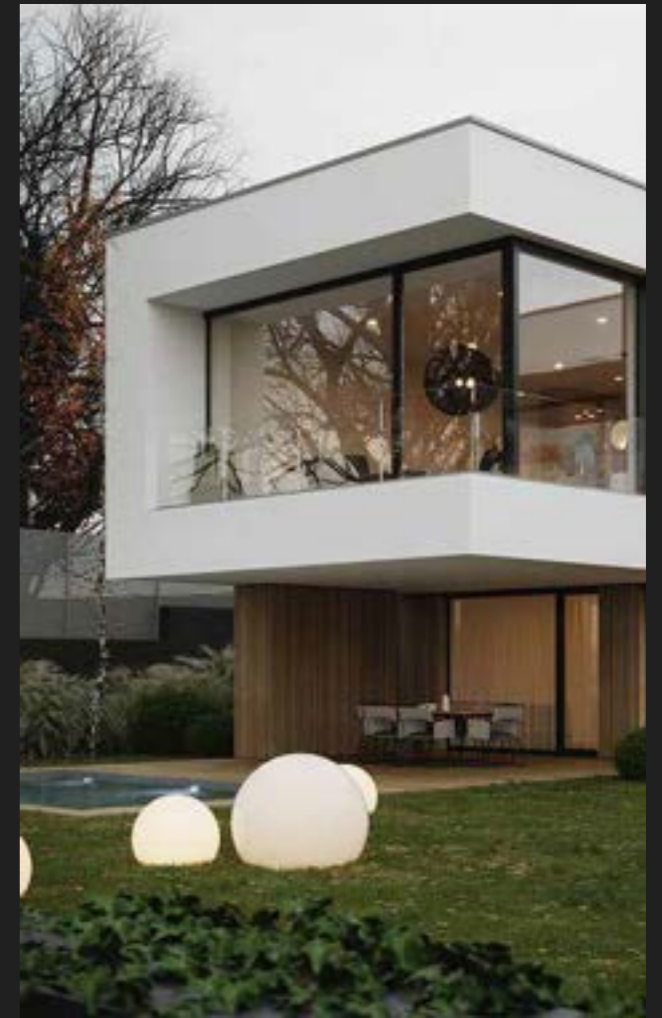

Contemporary

Contemporary

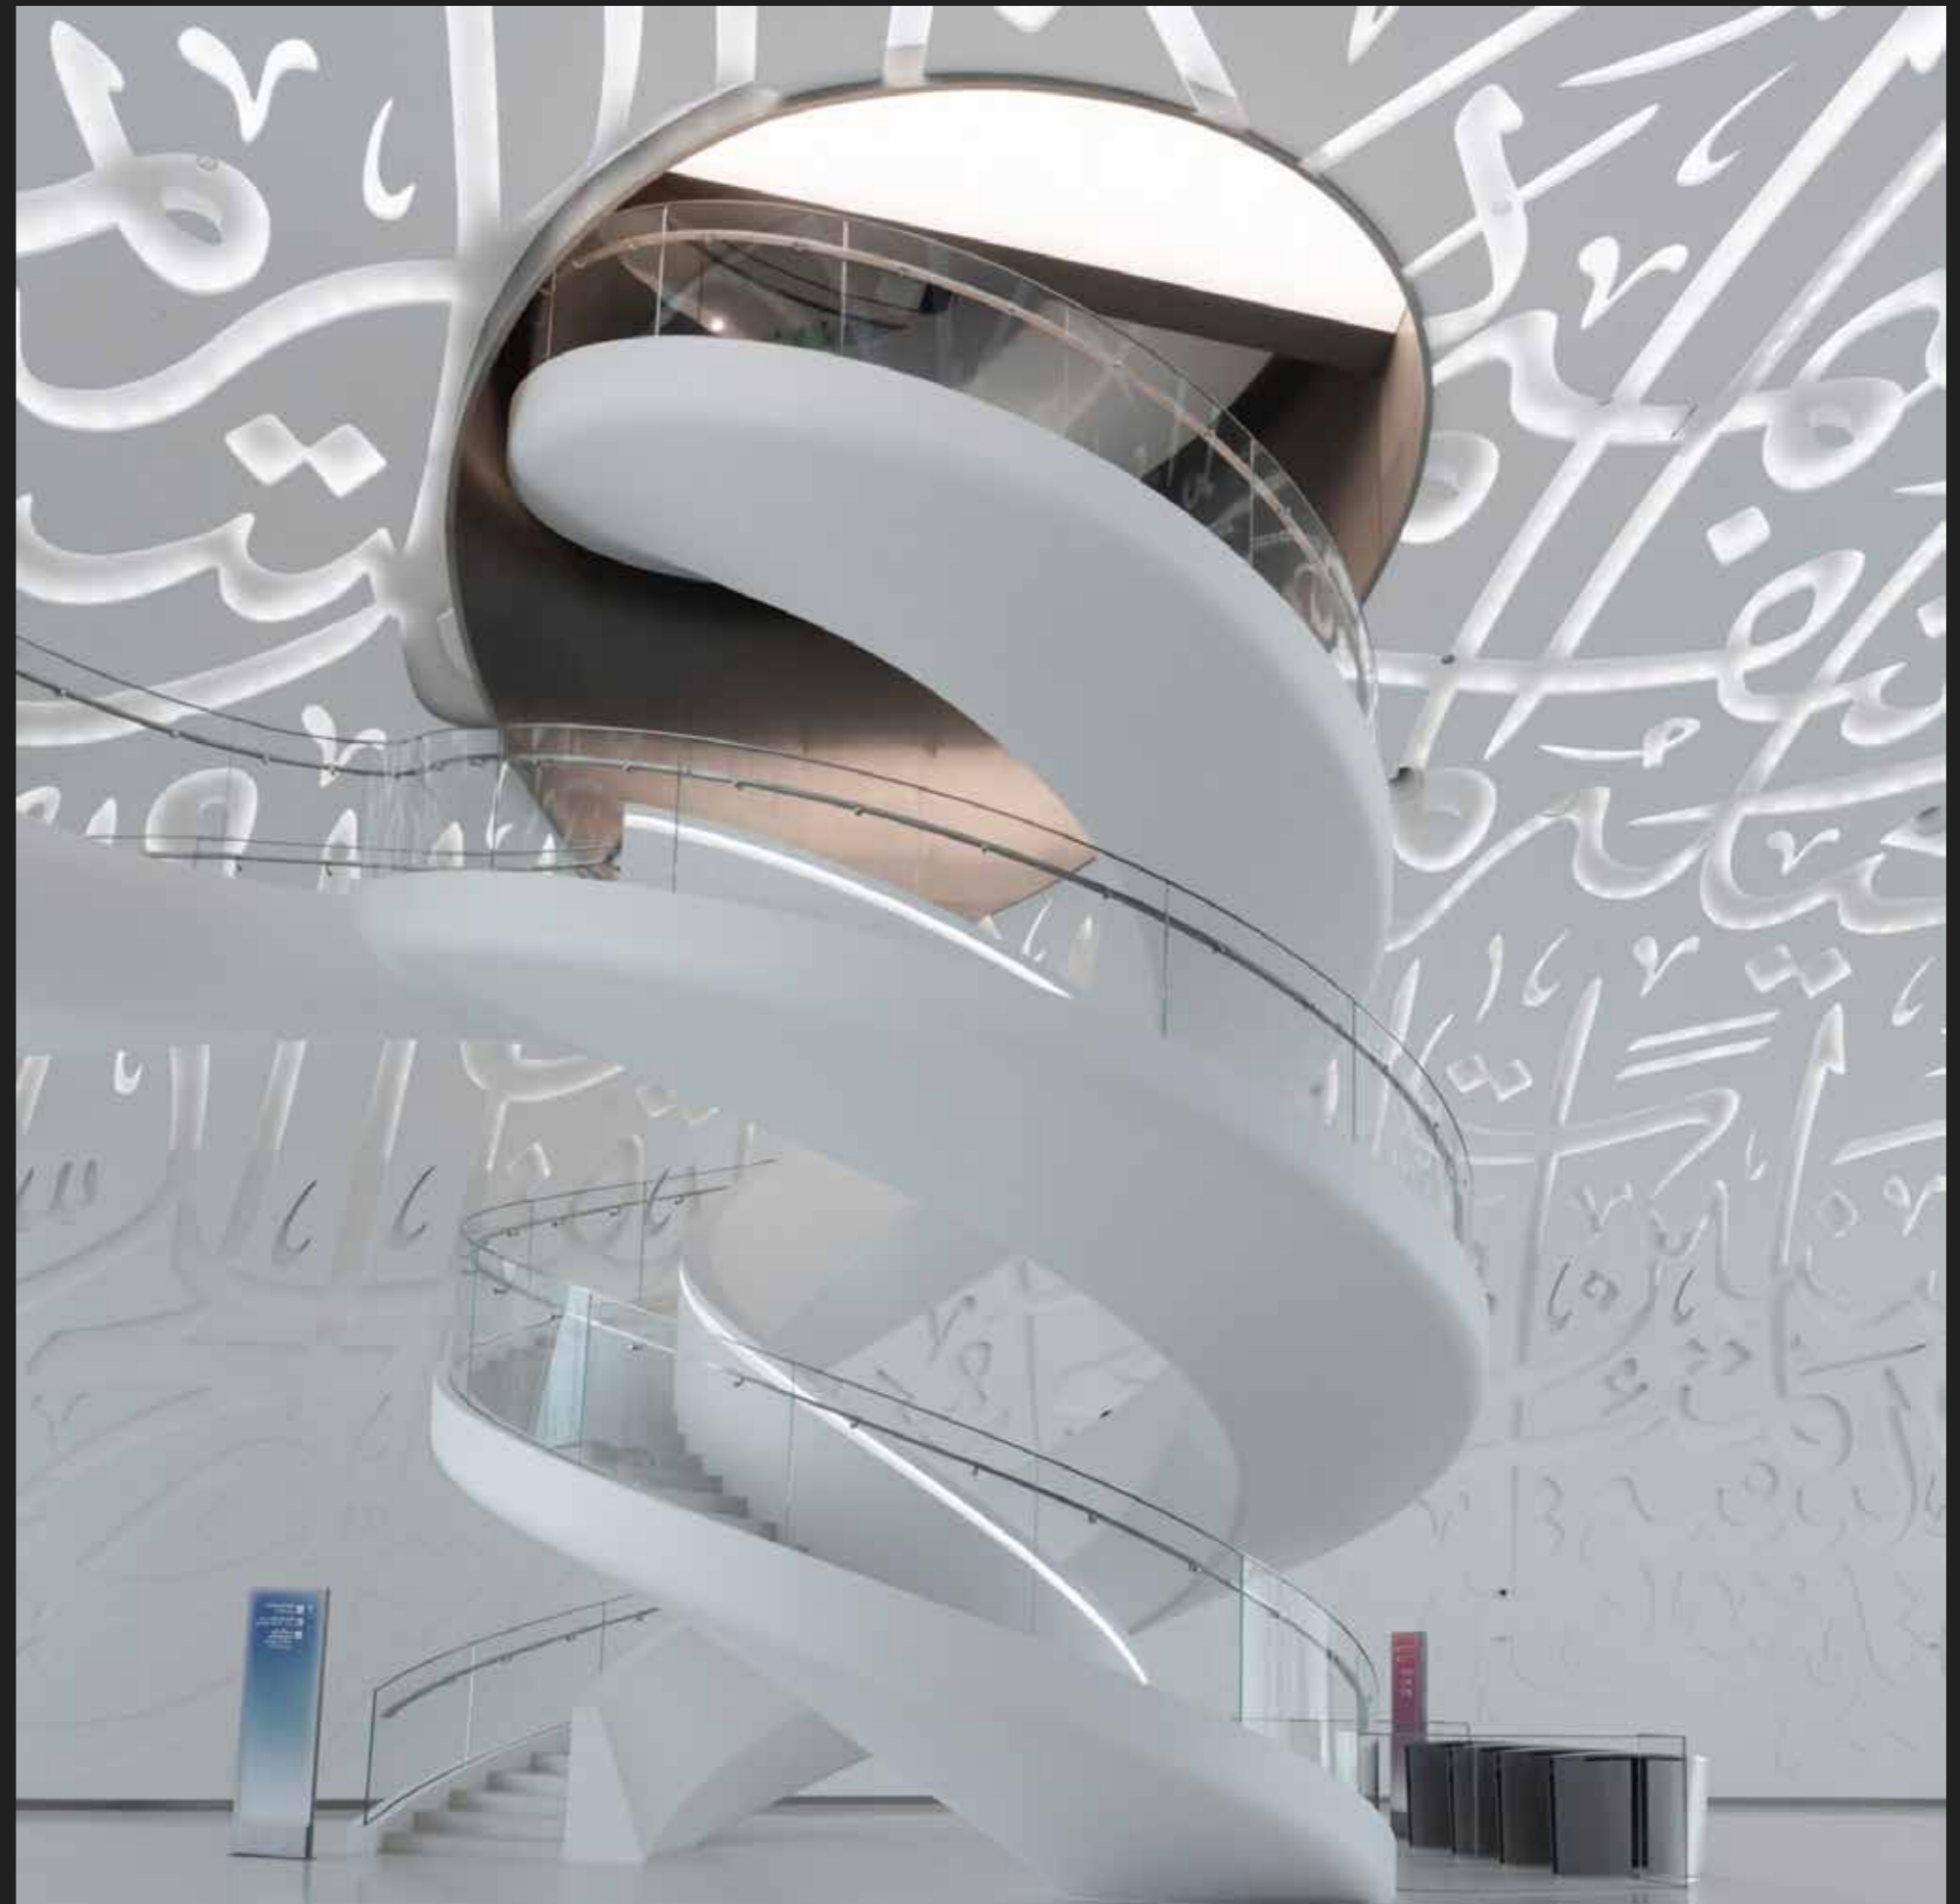

Contemporary architecture refers to the diverse and innovative styles of architecture that are currently being practiced and built in the present time. Unlike historical architectural movements with well-defined characteristics, contemporary architecture is characterized by its fluidity, adaptability, and responsiveness to the evolving needs of society, technology, and the environment

7

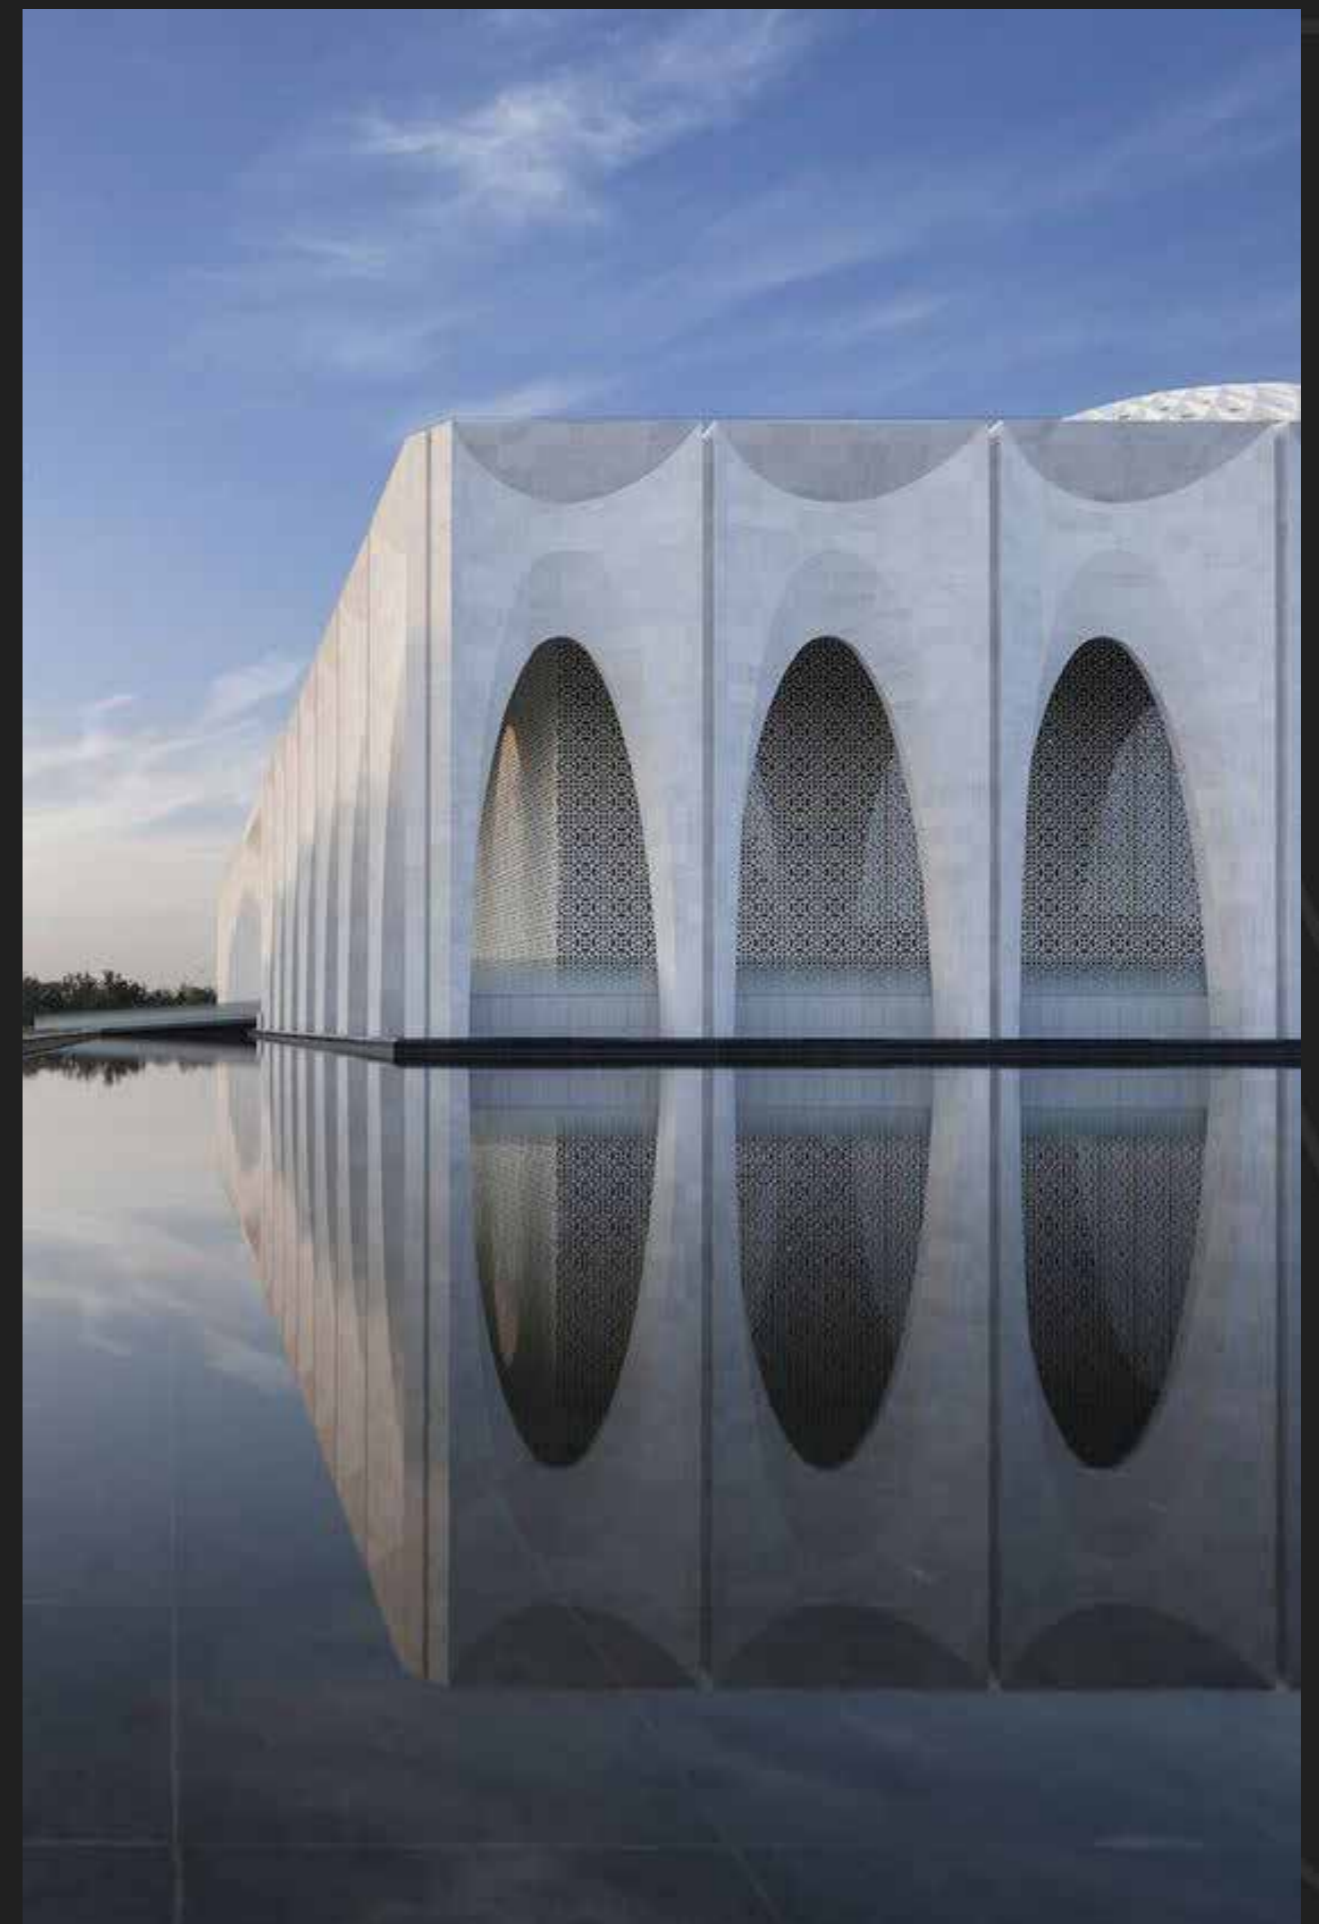

Neo arabic

Neo arabic

Neo-Arabic architecture» typically refers to a contemporary or revived architectural style that draws inspiration from traditional Arabic or Islamic design elements. This style often combines traditional features with modern design principles to create buildings that reflect both cultural heritage and contemporary aesthetics

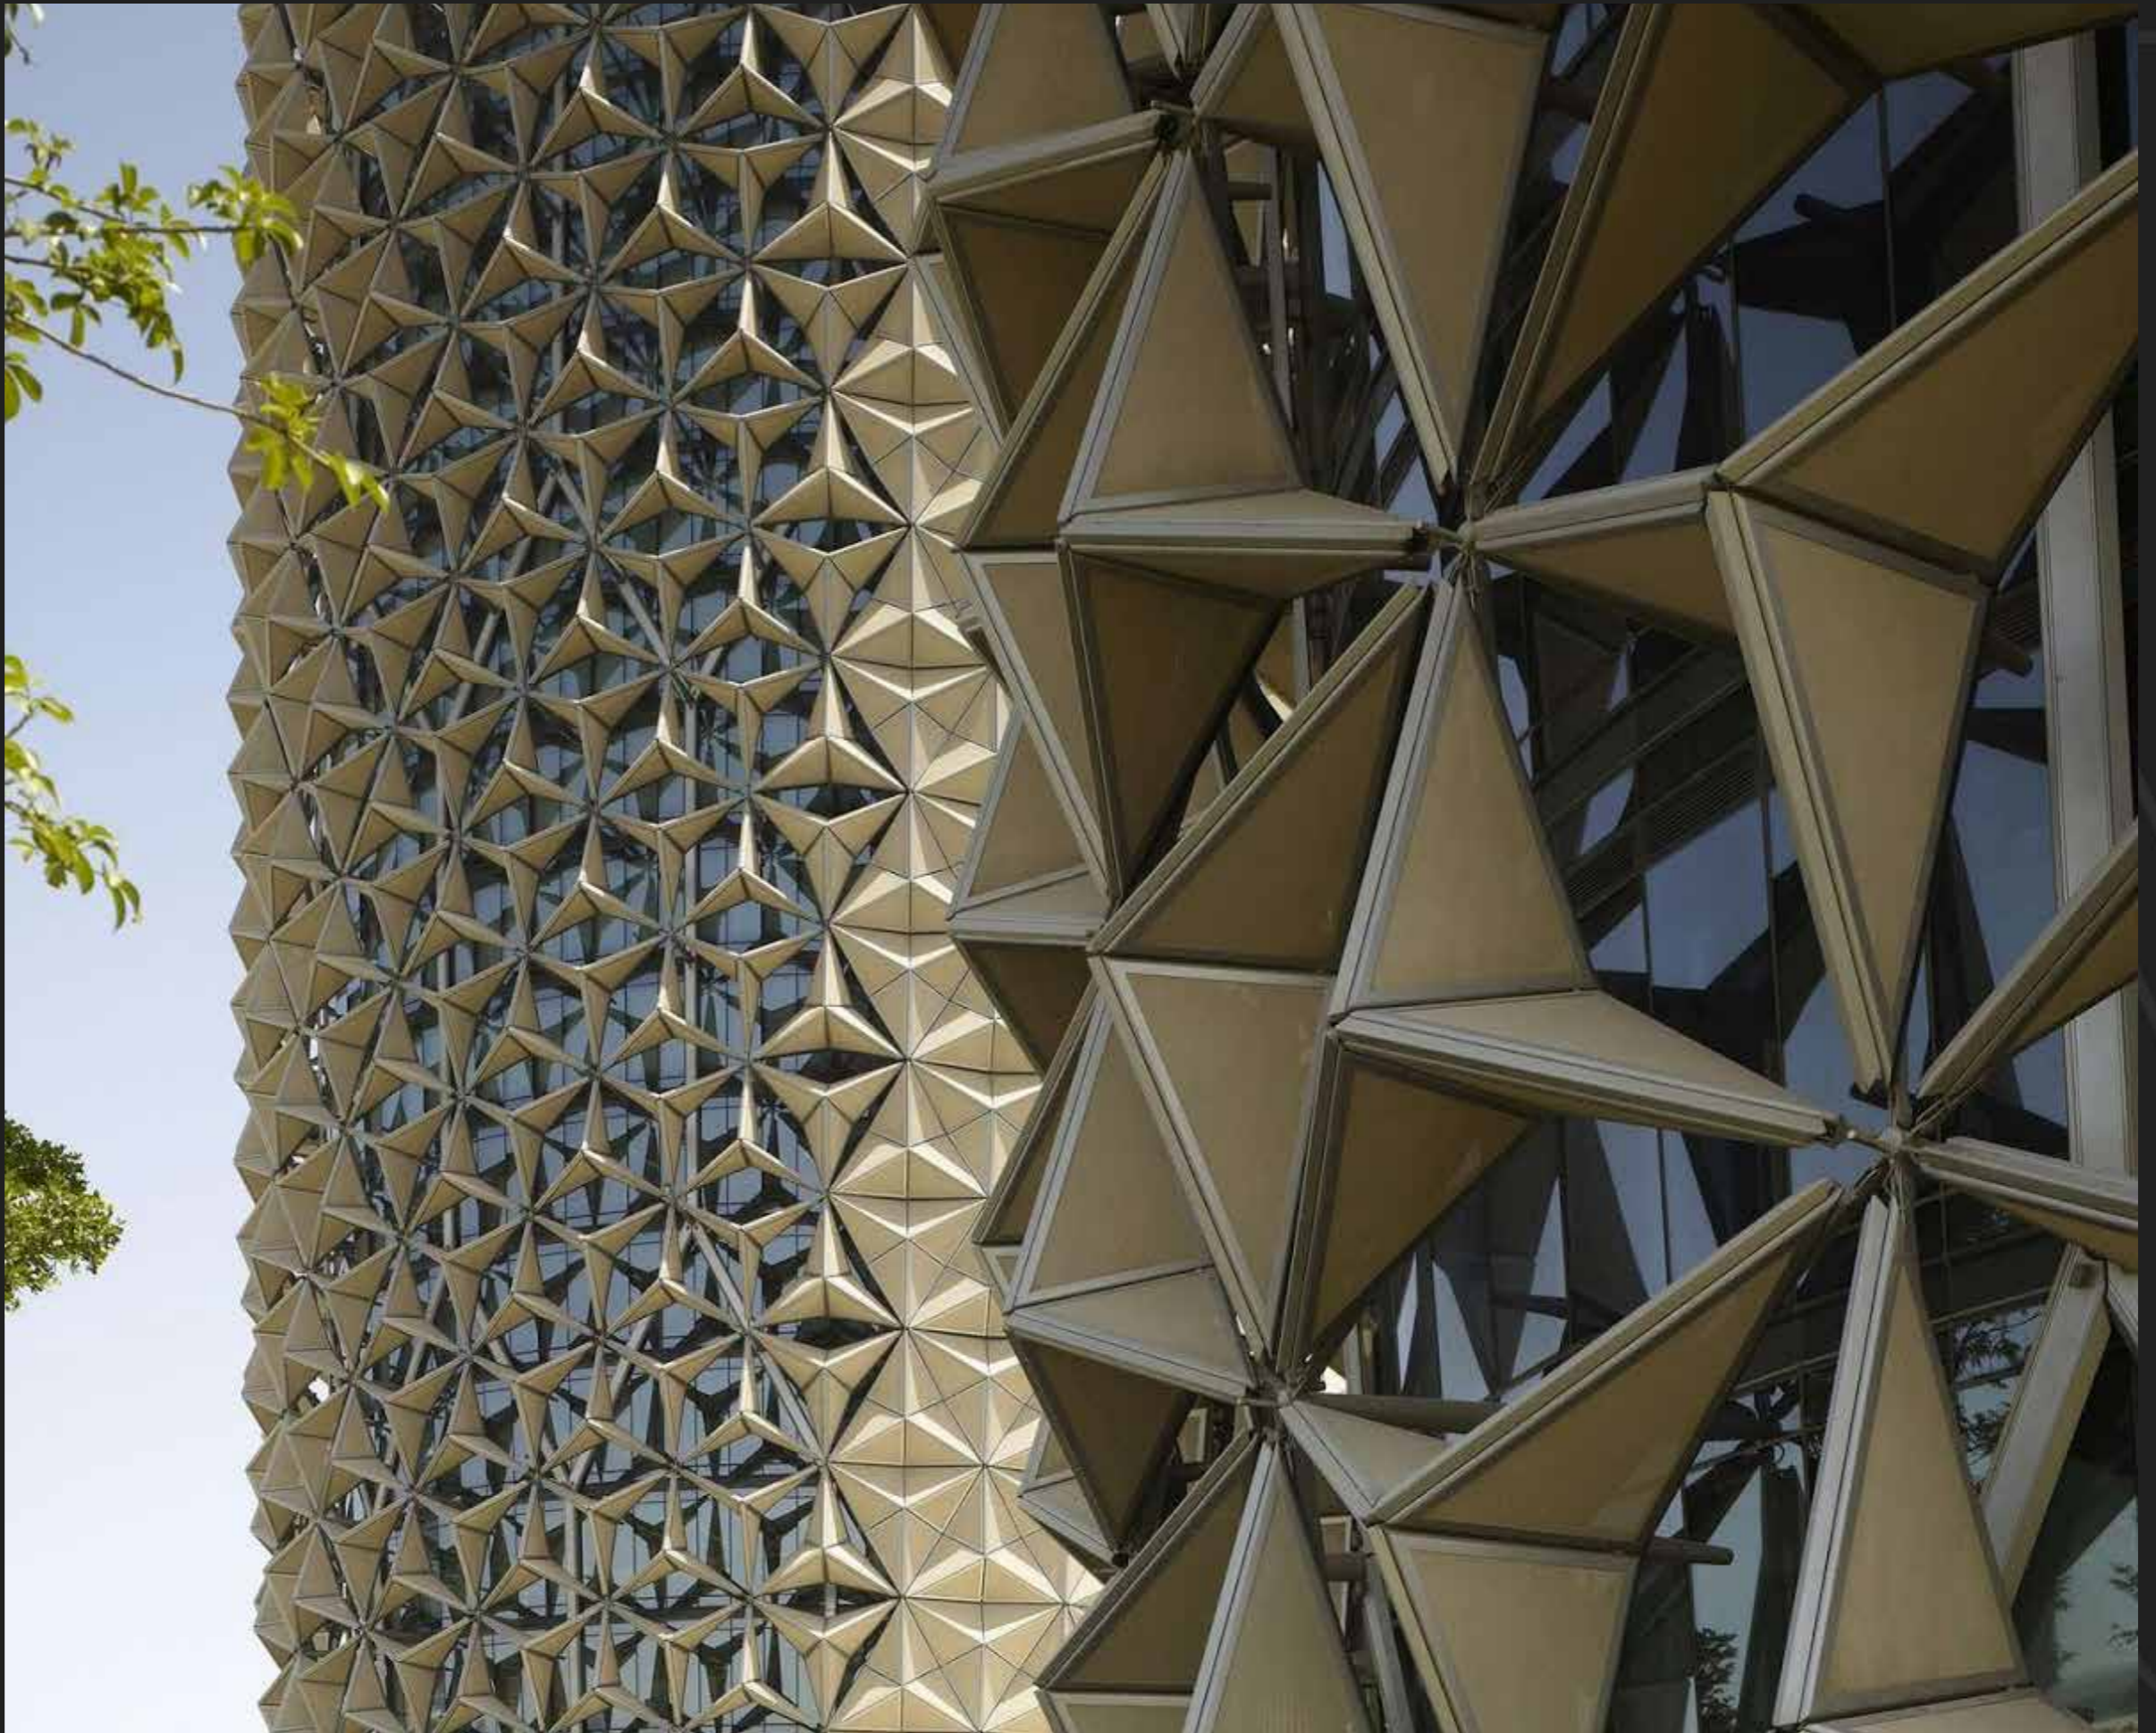

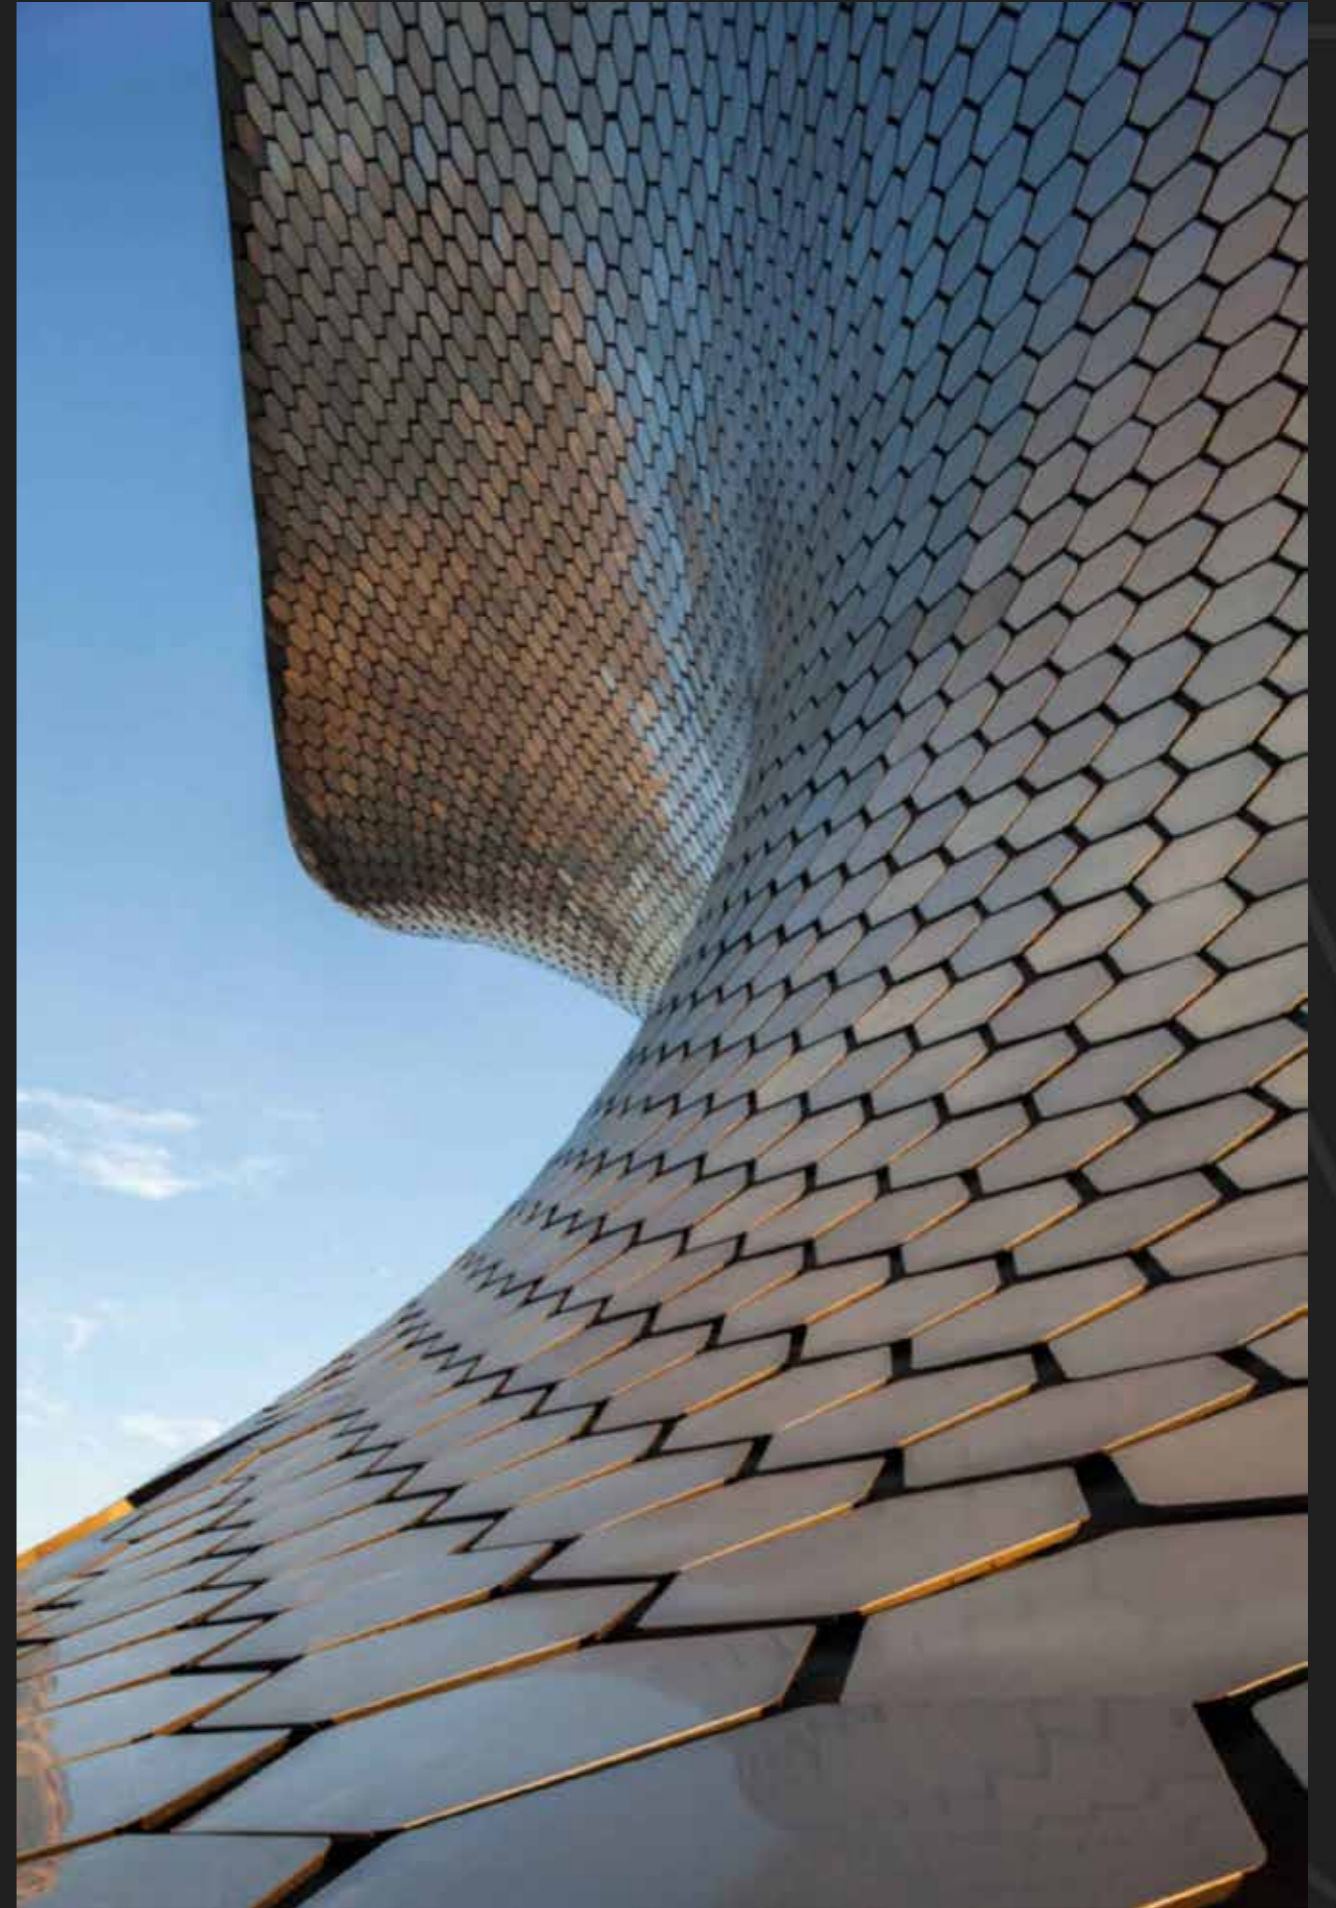

Parametric architecture refers to a design approach that utilizes parameters and algorithms to generate and manipulate architectural forms. It involves using mathematical equations, rules, and parameters to create complex and adaptive designs

Parametric

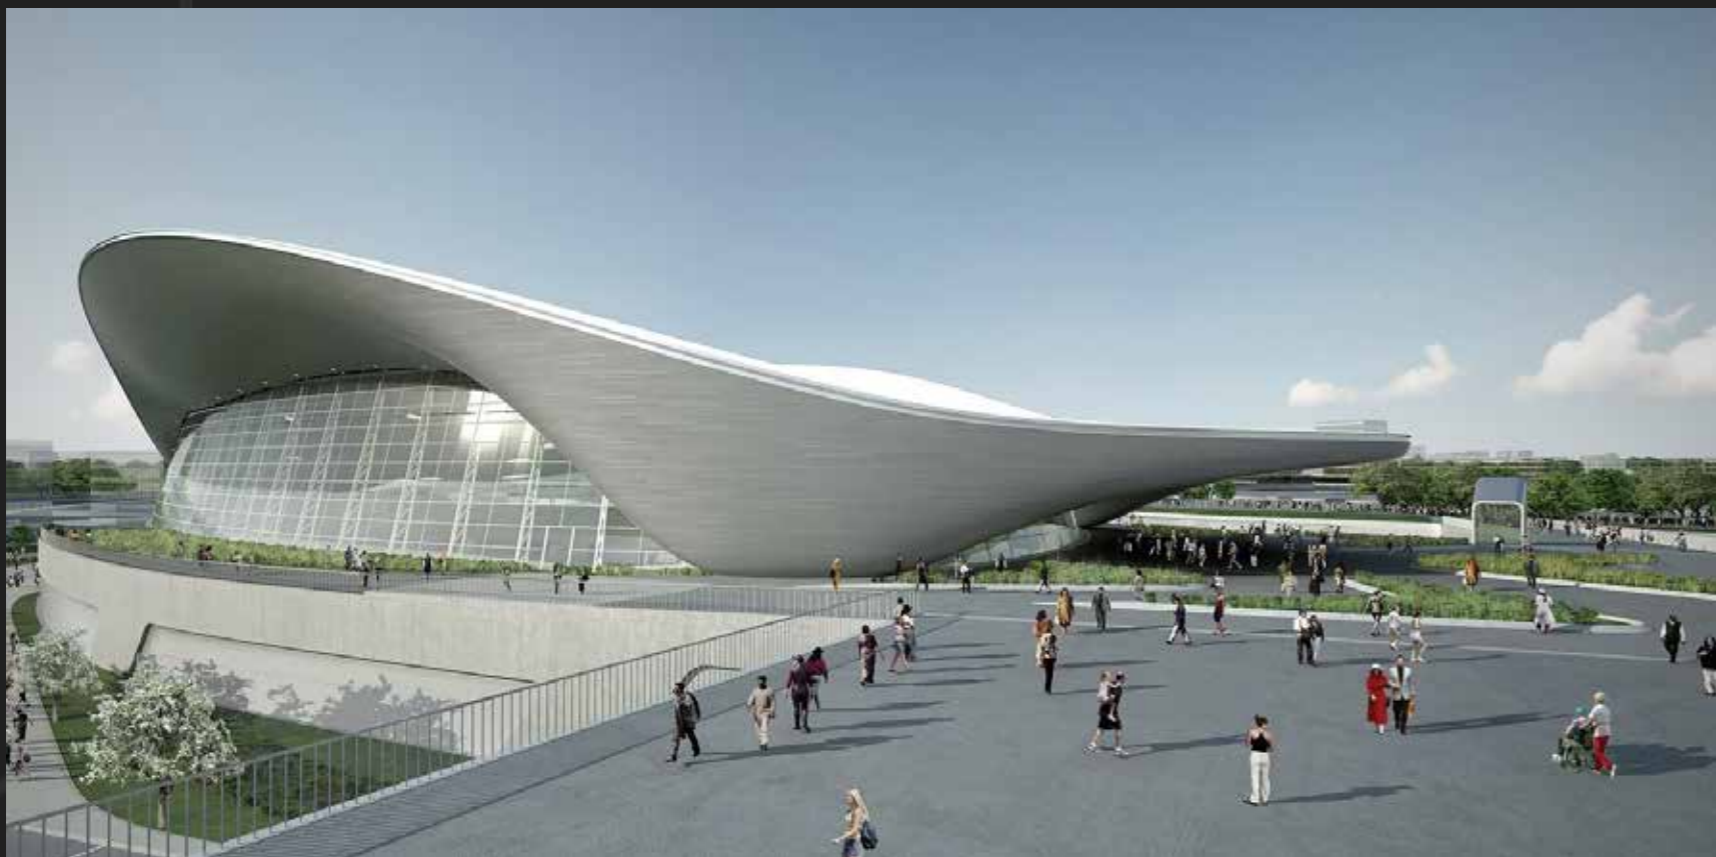

Futuristic

Futuristic architecture is a style that envisions and incorporates innovative design elements, cutting-edge technologies, and a forward-thinking approach to architecture. This style often seeks to break away from traditional forms and embrace new materials, sustainable practices, and unconventional shapes

Futuristic

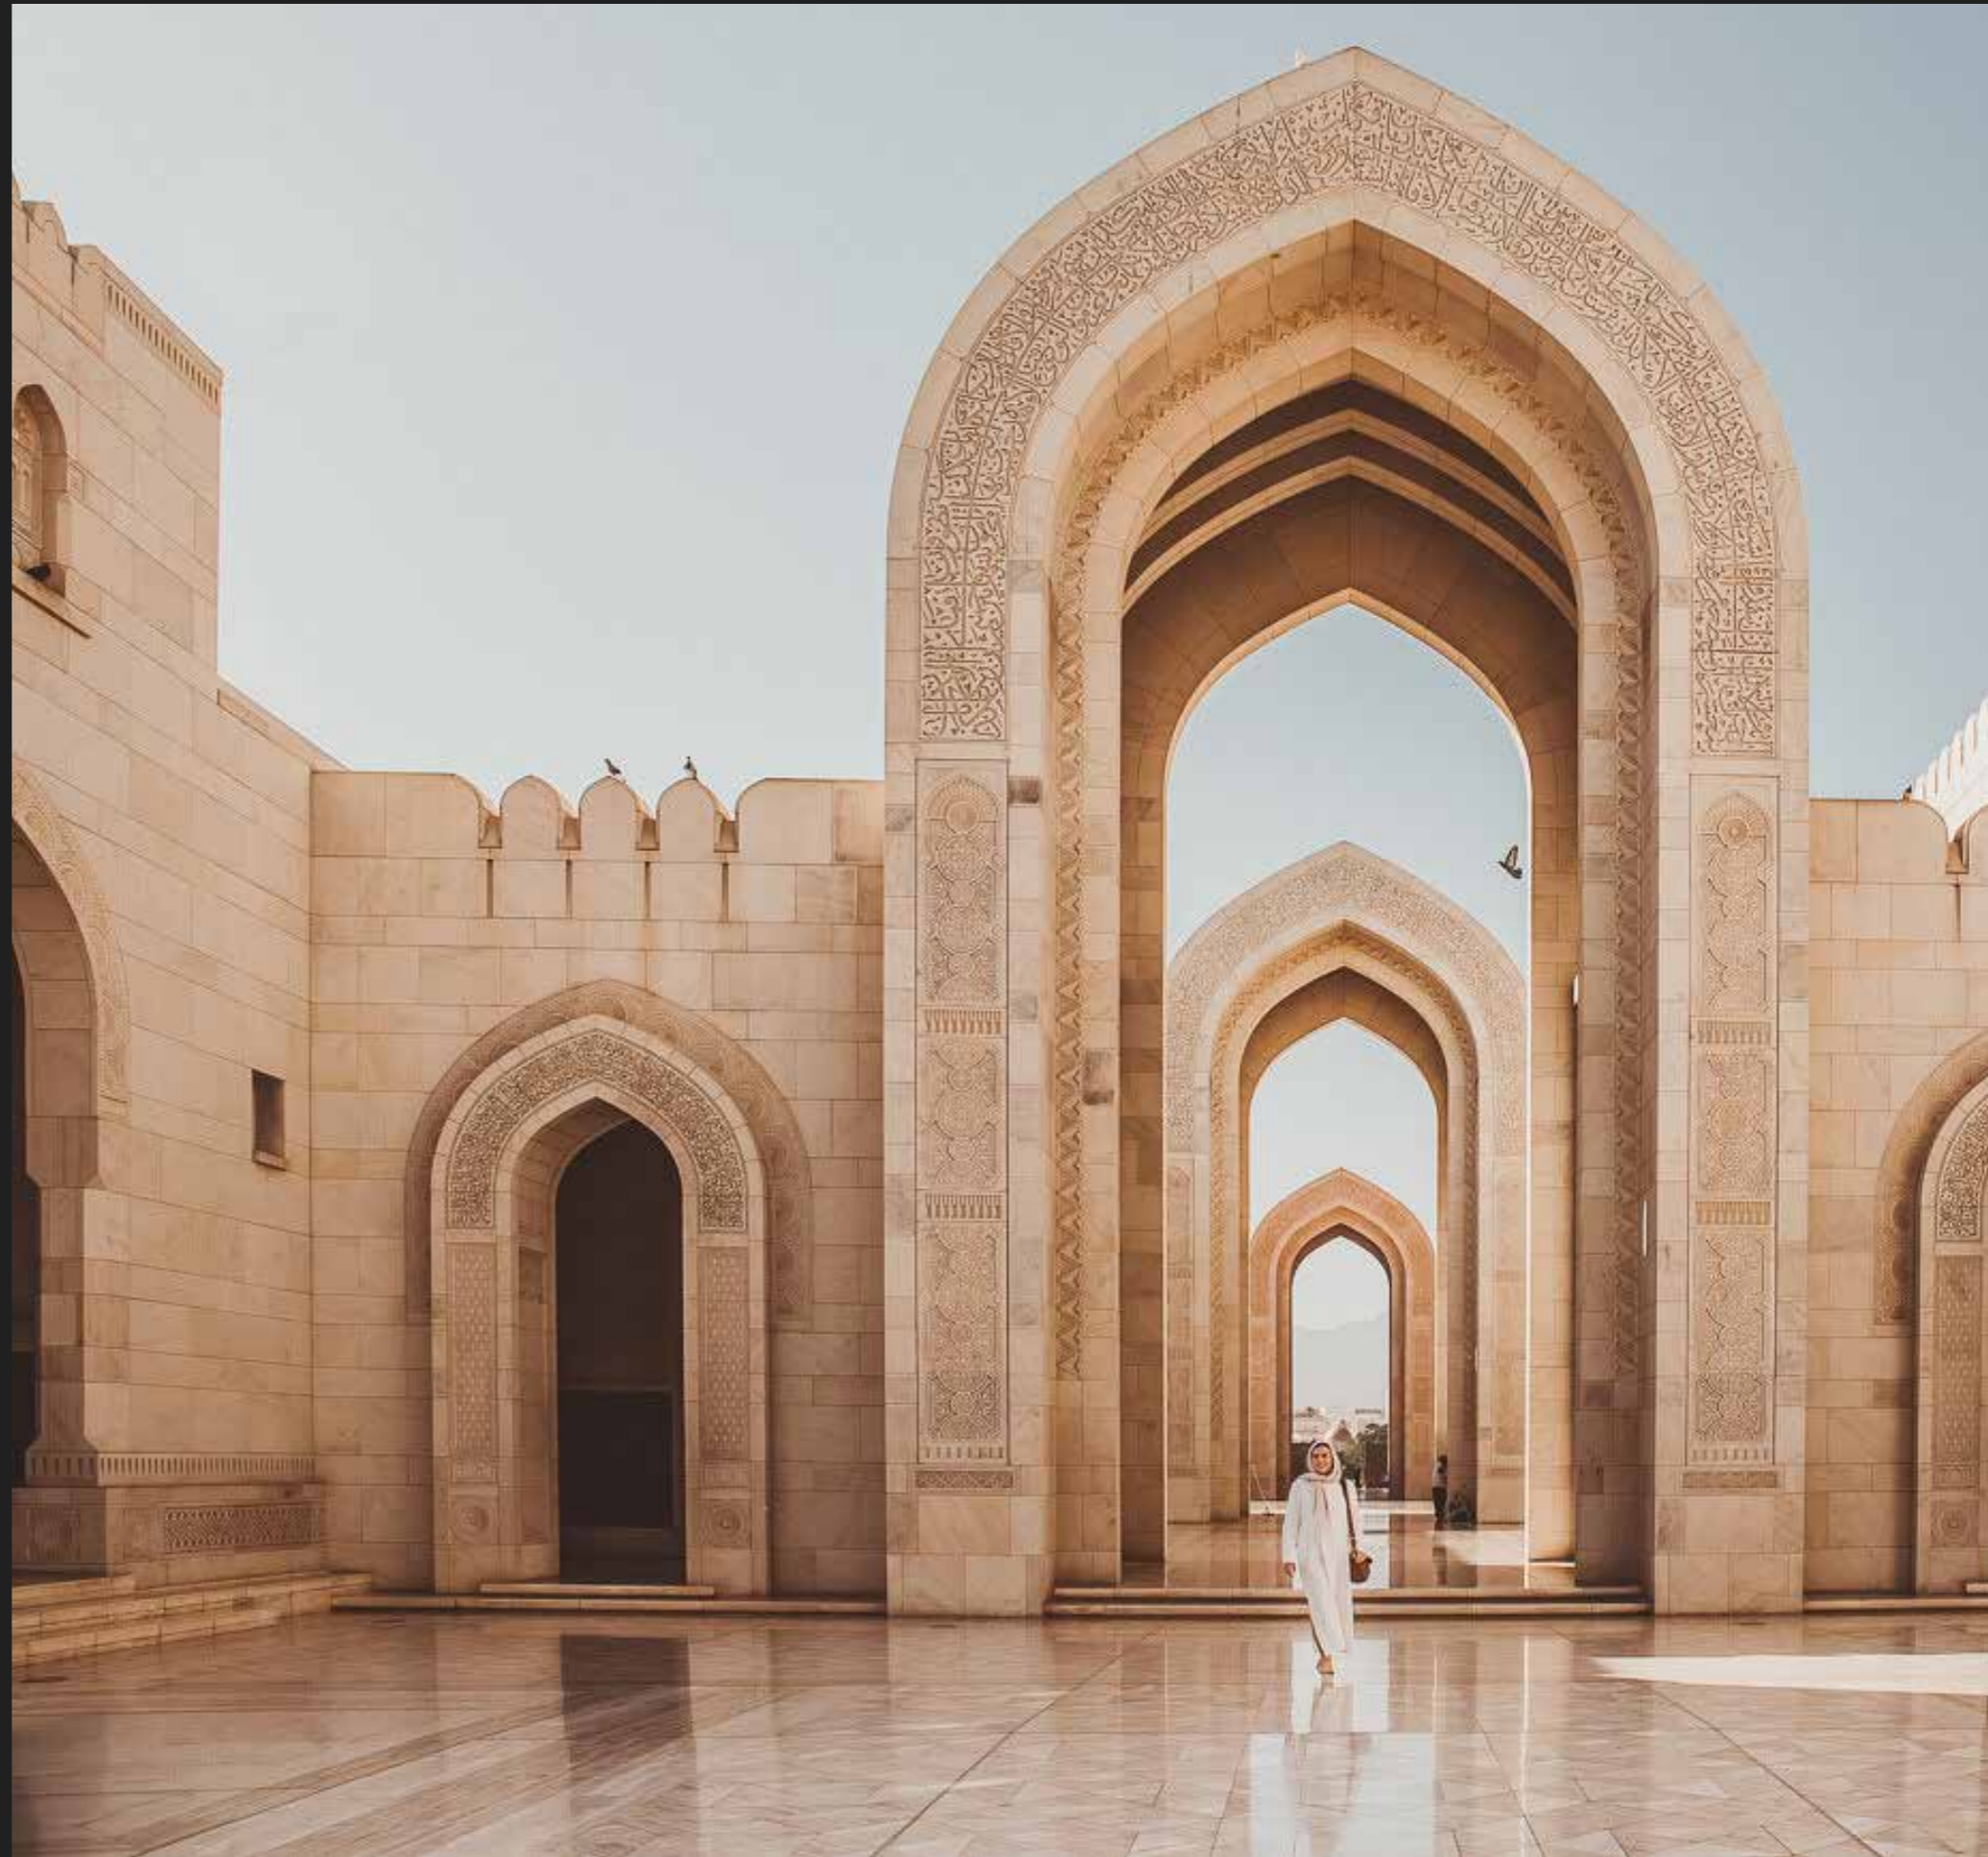

10

Islamic

10

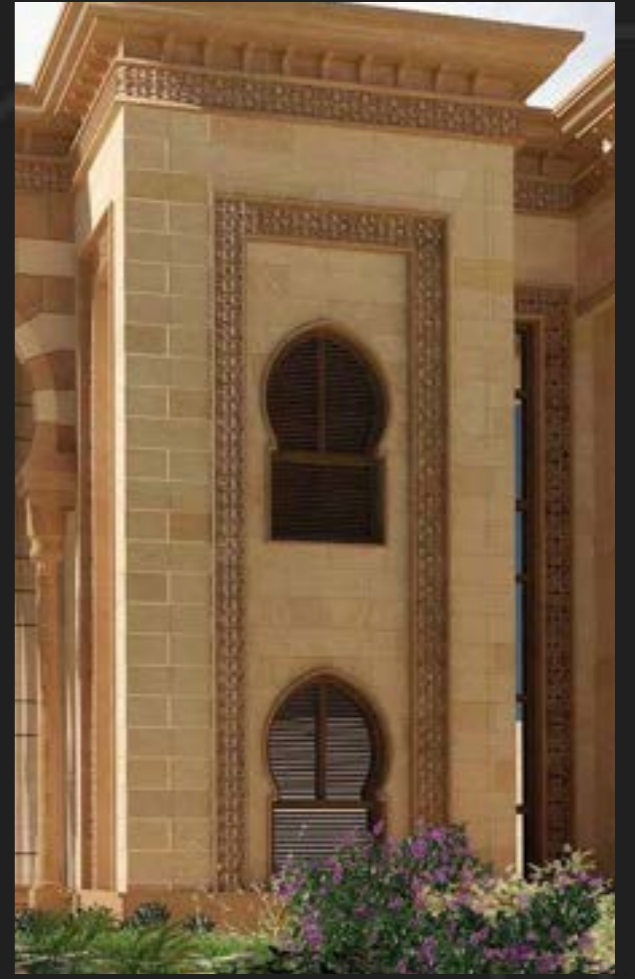

Islamic

Islamic architecture is a style of building design influenced by Islamic teachings and traditions. It features elements such as mosques with minarets, courtyards, and domes. Common characteristics include geometric patterns, Arabic calligraphy, and arches. Islamic architecture often incorporates regional styles

11

Green

Green

Green architecture, also known as sustainable or eco-friendly architecture, focuses on designing and constructing buildings with minimal negative impact on the environment while promoting energy efficiency, resource conservation, and a healthy indoor environment. One simple aspect of green architecture is the incorporation of energy-efficient technologies and practices

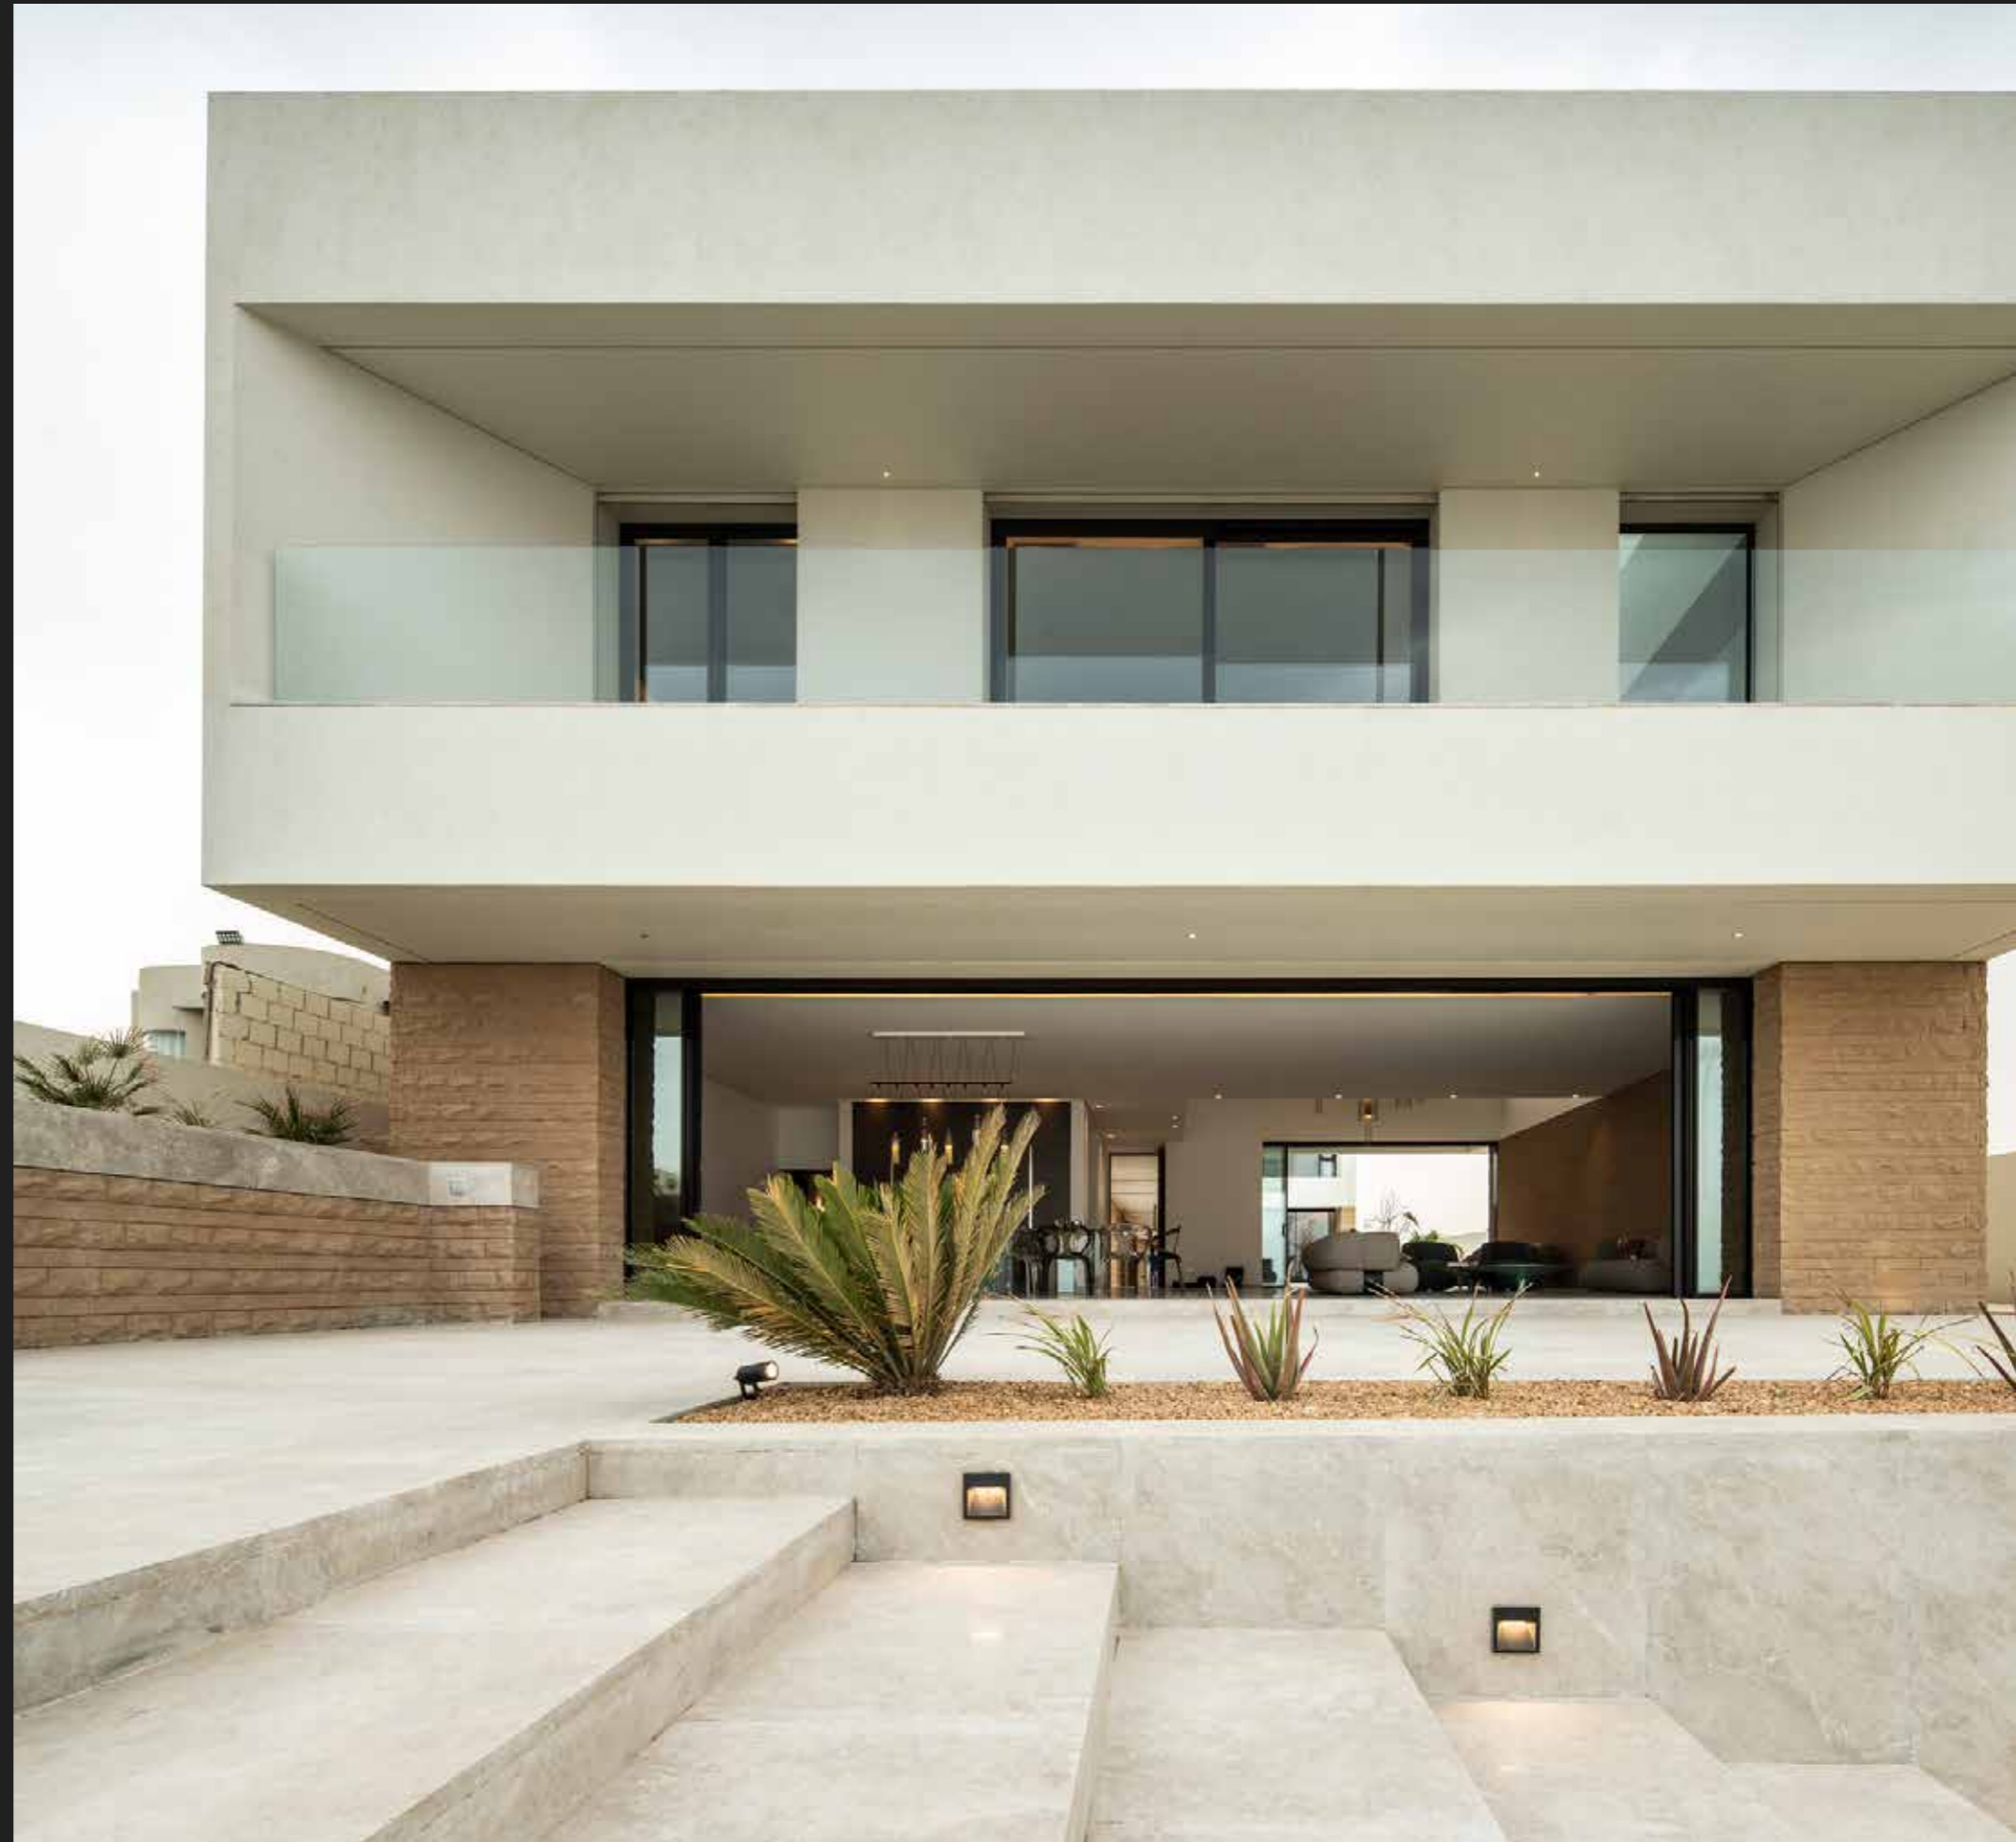

10

Minimalist

14

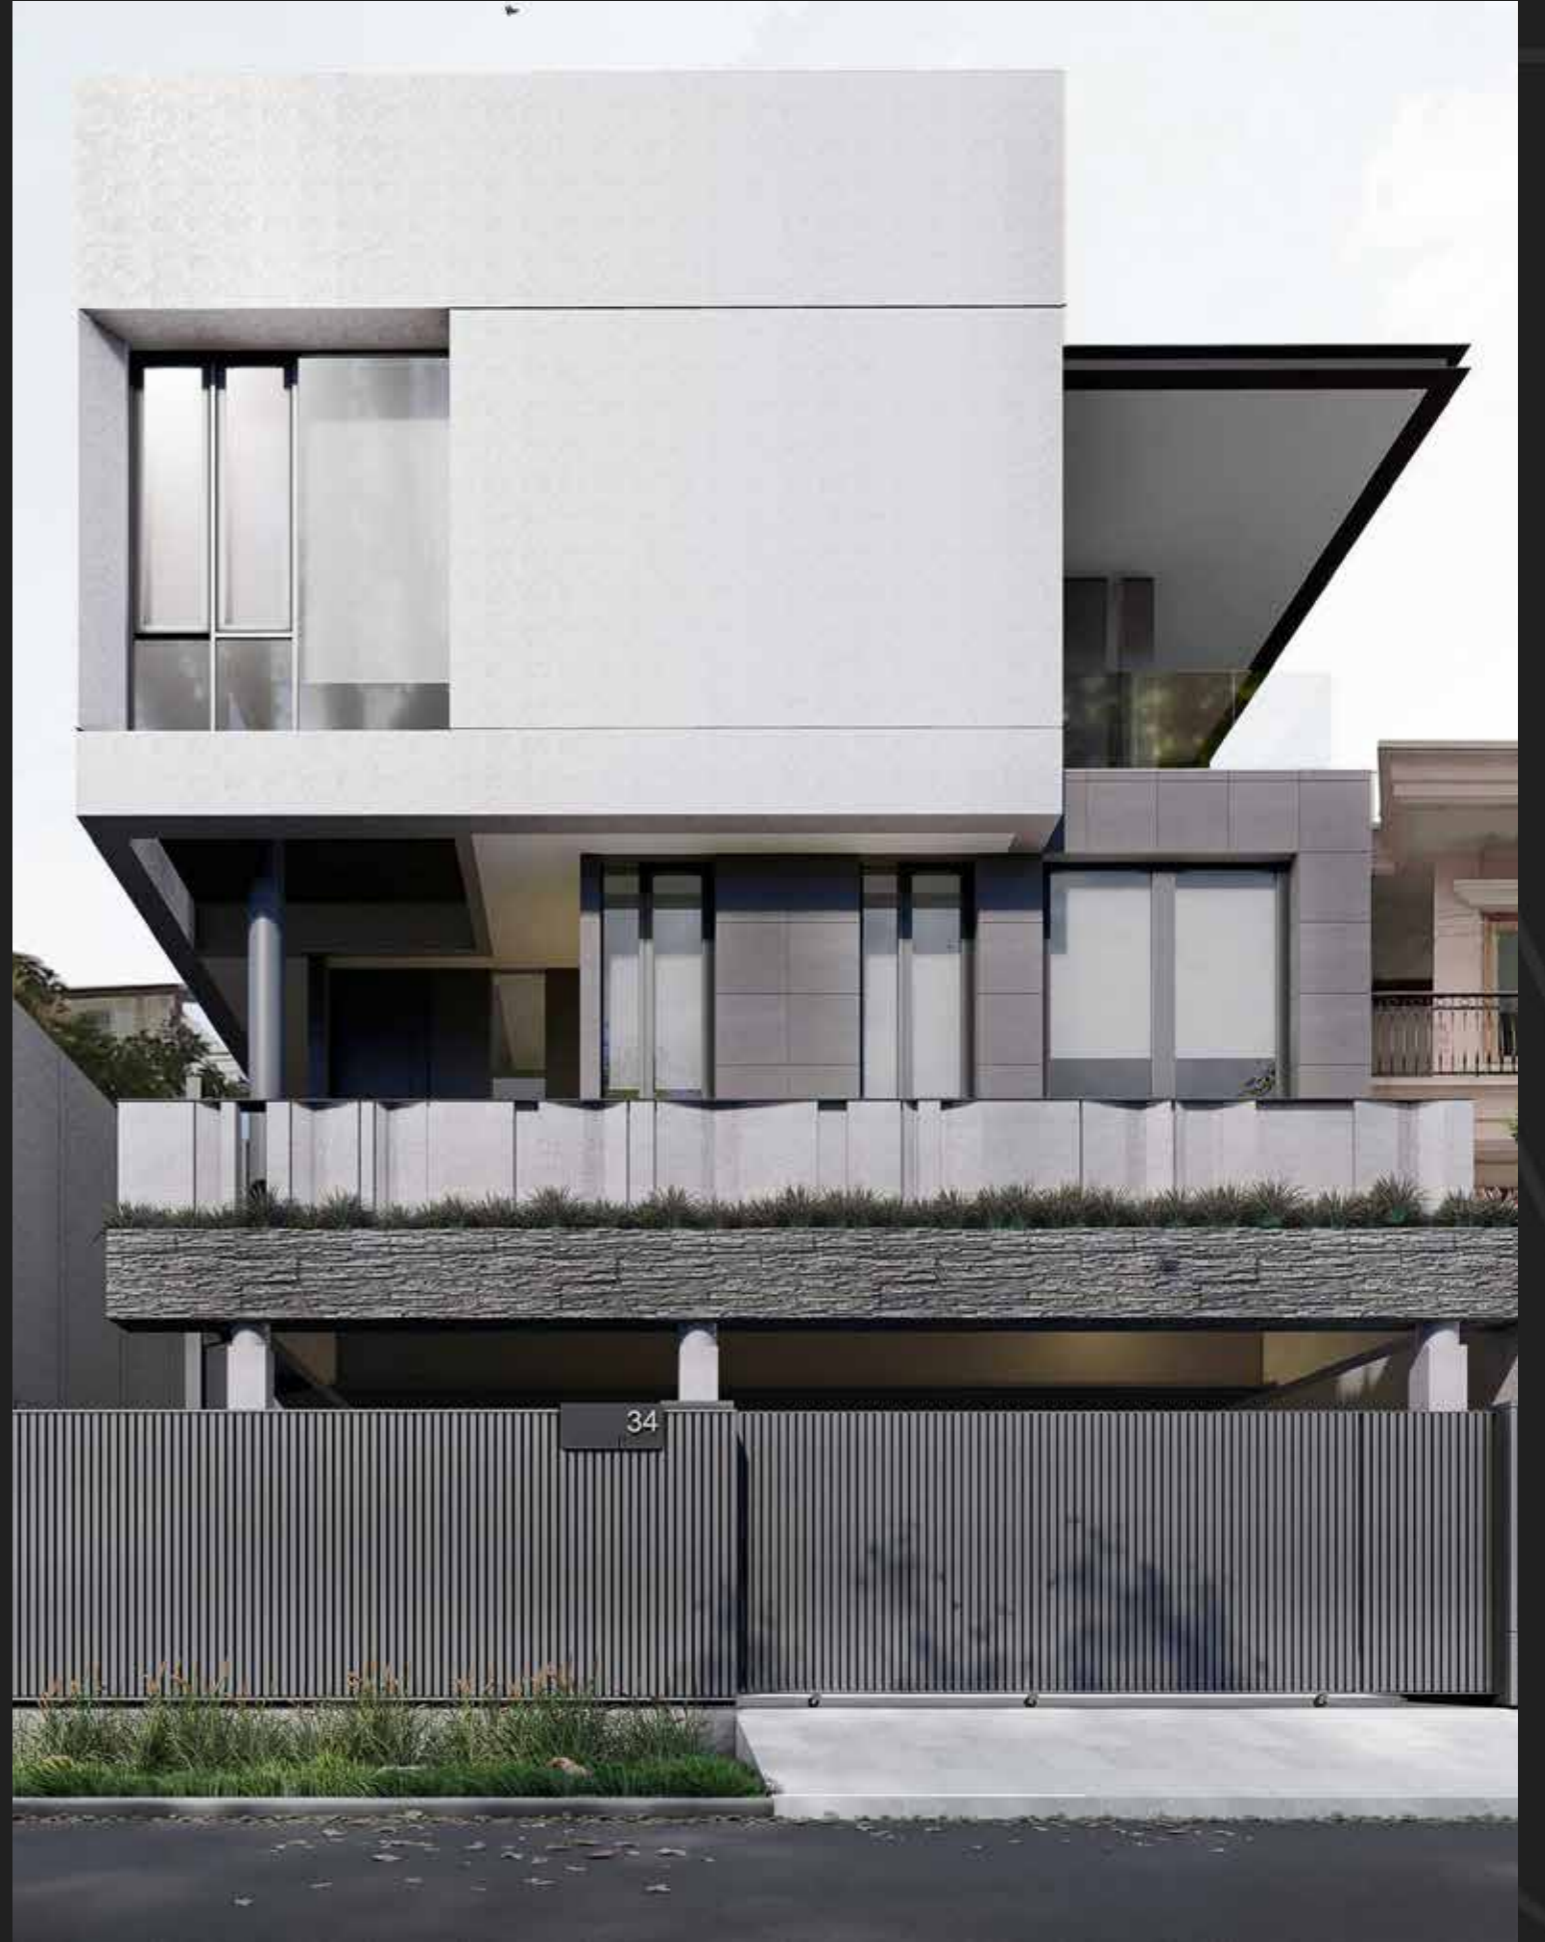

Minimalist

Minimalist architecture is a design approach characterized by simplicity, clean lines, and a focus on essential elements. It emphasizes functionality while eliminating unnecessary ornamentation

102 Organic

Organic architecture is a design philosophy and approach to architectural practice that seeks harmony between human habitation and the natural world through a thoughtful integration of form, function, and the environment. This style is often associated with the work of architect Frank Lloyd Wright, who coined the term «organic architecture».

Organic

14

Art nouveau

14

Art nouveau

Art Nouveau architecture is an artistic and architectural style that emerged in the late 19th and early 20th centuries, reaching its peak popularity around 1910. It is characterized by organic forms, flowing lines, and a focus on decorative elements inspired by nature.

15

Compound

15

Compound

The term «architectural compound» typically refers to a complex or collection of buildings and structures that are closely situated and often designed to function together as a unified whole. This term is often used to describe a grouping of structures on a property that share a common purpose, style, or design concept

16

Landscape

Landscape design is the art and practice of planning and arranging outdoor spaces for aesthetic, functional, and environmental purposes. It involves the careful consideration of various elements, including plants, hardscape features, topography, and climate, to create a well-balanced and visually pleasing environment. The primary goals of landscape design include enhancing the beauty of outdoor spaces, optimizing functionality, and fostering a harmonious relationship between the .built and natural environment
